SHEET 4 OF 4

SCALE : 1 : 10,000

THE SURVEY WAS EXECUTED DURING THE PERIOD OF JULY 23, 1991 TO AUGUST 6, 1991 BY T. B. UNDERHILL, C.L.S.

LEGEND :

Bearings are grid, determined from Land Survey Adjustments of the control traverse between Sheet Harbour and Cape Parry (Adjustment 1991) which holds all co-ordinates published in Canada Lands Survey Records 1991. Grid bearings were confirmed by Solar Observation as shown on the plan here.

Distances shown are computed horizontal at ground ground level and are expressed in metres. Chains = 20.1168 metres.

Control Monuments found shown thus ..... ⊕
Boundary Monuments placed shown thus ..... ●
Traverse lines and stations shown thus ..... ——○——
Boundary dealt with by this plan of Crown Land shown thus ..... ▬▬▬▬
Ordinary High Water Mark shown thus ..... ~~~~~
Water Courses and shoreline shown thus ..... ~~~~~
Lakes shown thus ..... LAKE

A Boundary Monuments have a 1.22 m Canada Metal post placed 1 m East of the Monument.

B Boundary Monuments placed during the course of the survey are those which are to appear clear cut on the ground. Each Monument is identified by a Monument Number, which will be appropriate Boundary Monument number, land number and 1991 for the year of the survey.

Traverse lines and offsets have been exaggerated for clarity.

UTM stands for Universal Transverse Mercator.

Co-ordinates are referred to the UTM Zone 9 (approximately). Supplied Photo Control Points are shown as solid photogrammetric recovered when C.S.S.D.D.C.L.S.

Topographic detail has been compiled from the following photography :

Date of Photography : 1970
Roll Numbers : A17007 Photo Numbers : 32, 34
A17008 Photo Numbers : 3, 4, 13, 14

C.L.A.
